APS386

Rev. 2 - 02/2009

2900/004 **2970/004**
(both shown with 4 pushbuttons)

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The remote station(s) shall be Alpha Communications®/Elvox 2900/001 (flush) or 2970/001 (surface) or approved equal. Remote station(s) shall be finished in natural anodized aluminum finish. The 2900/001 shall be provided with a flush backbox, and the 2970/001 shall include a built-in rainhood.

Both models shall be compact in design and can be used indoors or outdoors.

Both models shall include a built-in plastic call button, to signal to one or more of the 870W, 8870, or 902 series inside handset stations.

Both models shall require that the contractor furnish and install the model 930A speaker/microphone assembly, in the field. The microphone shall be an electret condenser type.

Contractor shall observe all local and national electrical and building codes

2900/001 and 2970/001 Remote Stations

The 2900/001 (flush) and 2970/001 (surface) aluminum remote stations are primarily used with the 870W, 8870 and 902 series handset intercom stations.

Both remotes are designed for indoor or outdoor use, and have a single call button to call to one (1) or more inside handset stations. The 2970/001 even has a built-in rainhood.

Both remotes are finished in natural anodized aluminum finish, and are very compact in size, to allow mounting in very narrow locations.

Both models require the field installation (snap-in) of the model 930A speaker/microphone assembly, which must be purchased separately.

FEATURES

- Built-in Call Button
- Easy Installation
- Compact Design
- Anodized Aluminum finish
- Clear voice fidelity
