

Model 11201-09 (shown)

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

Specialty Call Cord(s) shall be Alpha Communications®/Crest model# 11201-09 BreathCall series or approved equal. The call cord(s) shall be standard 1/4" phono plug type with 9 foot cable and a 36" flexible conduit, in Black color. Each model# 11201-09 shall have a momentary call button. Each BreathCall shall be installed using the model # S-18 headboard mounting clamp.

Call cord(s) shall be activated by a puff or air, and shall have replaceable mouthpiece straw and filter assemblies.

The call cord(s) shall be UL 1069 listed to the latest 4th Edition standards.

BreathCall Specialty Call Cord

The Alpha Communications® BreathCall series call cords are used primarily with patients or residents that are unable to use their hands or body to place a call, using a conventional type call cord. They can be used with a variety of nurse-call stations, utilizing a standard 1/4" phono plug type jack.

To call a nurse or care-giver, just a puff of air activates the BreathCall unit.

The BreathCall unit uses a headboard mounting clamp (model S-18) and heavy-duty flexible conduit, to position the mouthpiece directly above or in front of the patient.

To maintain cleanliness and patient hygiene, the mouthpiece straws and filters are easily replaceable.

FEATURES

- UL 1069 Listed - 4th Edition standards
- Heavy-Duty Flexible Conduit
- 36" Long Tubing and 9 foot cord
- Requires only a puff or air to activate
- Replaceable Mouthpiece Straw and Filter
