6204 Remote Handset

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The 8-Digit Digi-Bus™ handsets shall be Alpha Communications®/Elvox™ 6204 Petrarca style, or approved equal. At each remote location, contractor shall furnish and install one (1) model 6204 handset. Each handset shall include its own unique 8-digit coding and decoding microcontroller. Handsets shall be Soft White color and shall mount right to wall or standard single gang electrical "gem" box. Wiring to handset shall be 4-common wires (looped) per handset. Where required, each model 6204 remote handset shall have up to 4 model #6C59 2-pushbutton modules installed, for special functions.

Contractor shall observe all local and national electrical and building codes.

6204 8-Digit Petrarca Digi-Bus™ Handsets

The Alpha Communications®/Elvox™ 6204 (Petrarca Style) handsets are part of the 8-digit Digi-Bus™ Digital Electronic Audio Door Entry System, that can be used in Luxury Apartment Buildings, Assisted Living Facilities, Dormitories, Health Care Facilities, Hotels, Motels, Schools, Offices, Bowling Alleys and Supermarkets. The 6204 series are advanced handsets, using up to an 8-digit user code programmed directly from the entrance panel or switchboard. The Digi-Bus™ system is ideal for large building units because many installation problems have been solved by eliminating the use of switching modules, and its large capacity of 99,999,999 remote handsets.

The 6204 handsets can be used as stand-alone audio units, or combined with the 6000 series monitors for use as a video-intercom system. When used with the 6000 series monitor(s) a model# 6145 wall plate is required and optional model# 6142 desk mount kit.

FEATURES

- Easy 4-Wire Intercom Hookup to Handset (looped)
- Private Conversation from Handset to Switchboard
- Up to 99,999,999 Remote Handsets on one system
- Compact Size 945B Master Switchboard Mounts Conveniently right on Desk-Top, or use with PC type Master Station(s)
- Multiple Entry Panel capability
